EXPANZO FRWR SERIES

Wall Floor Cover Plates Expansion Gap between Wall to Floor.

Technical Data.

Movement Rating $\pm 50\%$ (100% total)	
Product Guide	 Interior  Seismic  Fire Rated Option  Vapor Barrier Option

- 5/8" recessed frame designed for both surface and recessed mount.
- Secondary finish options available.
- Clear anodized standard finish.
- Snap-fit cover addresses aesthetics, hidden hardware for security and easy on-site assembly.
- Custom angles available.

Install the architectural joint system on a levelled, finished floor. This may require grinding or applying a levelling compound on top of the substrate to create a smooth mounting surface.

Installation Process:

- Trim the aluminium plates to the required length.
- Position the plates over the structural gap.
- For floor to wall condition, short leg (predrilled hole side) should be placed firmly against the finished wall. Align level with the finished floor.
- Mark the locations of the predrilled holes on the substrate. Using a 1/8" (3mm) drill bit, drill into the marked locations on the substrate to a depth of 2-3/8" (60mm).
- Secure the plates in place by aligning them over the drilled holes and fastening them with flat head Tapcon screws.
- Clean the exposed surfaces thoroughly using a non-solvent cleaner.

Thank
You

The text "Thank You" is written in a black, elegant cursive script. The word "Thank" is on the top line, and "You" is on the line below it. The text is centered horizontally. Behind the text, there are several overlapping, wavy, organic shapes in shades of pink and light blue, creating a soft, artistic background.

THE UNFOLDING JOURNEY CONTINUES TO REVEAL
NEW OPPORTUNITIES AND CHALLENGES AT EVERY
STEP
